- 📍 Block 18, Lot 30, Riviera Street, Fairway View Subd., Dasmariñas City, Cavite

## EDUCATION

**De La Salle University – Dasmariñas**

Bachelor of Computer Science

Major in Intelligence System

2021 - 2025

## TECHNICAL SKILLS

- Programming Languages: Python, Java, C
- Front-end Technologies: HTML, CSS, JavaScript
- Version Control: Git
- Design Tools: Figma, Canva
- Database Management: PostgreSQL, MongoDB
- User Interface (UI) Design
- User Experience (UX) Design
- Testing and Debugging

## CAREER OBJECTIVE

Highly motivated and innovative 3rd-year Computer Science student with a passion for creating visually appealing and user-friendly interfaces. Eager to leverage my technical skills and creative mindset to pursue a career as a front-end developer, UI/UX designer, or graphic designer. I am committed to contribute my skills to a dynamic team where I can enhance my expertise and make meaningful contributions to web development and design.

## PROFESSIONAL SKILLS

- Effective multitasking, prioritization, and meeting deadlines in dynamic development environments.
- Analytical prowess for efficient code debugging and problem-solving.
- Proficient at identifying and resolving technical issues for seamless web application functionality.
- Excellent communication, fostering collaboration among stakeholders in development cycles.
- Dedication to ongoing learning, staying current with web development advancements.

## PORTFOLIO

- Infographic Design - Created visually engaging infographics for various purposes, demonstrating proficiency in graphic design principles and tools.
- School Publications for Organization - Collaborated with team members to visually communicate complex programming concepts effectively.
- E-book Design - Developed user-friendly e-book with interactive elements and intuitive navigation, highlighting expertise in digital publishing platforms and UI/UX design principles.
- User-friendly Applications - Designed and implemented user-friendly interfaces for web and mobile applications, focusing on enhancing the user experience through design and efficient navigation.
- Game Design - Produced detailed design documentation outlining game mechanics, levels, and user interactions.
